Business or sector Government, IT

From November 1999
to June 2003

Full time IT Consultant

Timing S.r.l. – Lungomare IX Maggio, 36 - Owner

- Network Administrator
- WEB developer
- technical Support
- Consulting and design of LAN
- Microsoft Certified Trainer within the project RUPAR-Basilicata (550 hours of training in 4 months on the path MCSE-NT4 for staff of the Basilicata Region, USL, municipalities and other organizations)

Business or sector SoHo, Engineering, Market Research, IT

EDUCATION AND TRAINING

2001 **Microsoft Certified Trainer**

Studiodelta Srl - Via G. Amendola 162/1-70126 Bari

The MCT has allowed me to learn technics of teaching and classroom management. These techniques have proved useful in providing technical support to users and explain the functioning of any software.

1998-2000 **Microsoft Certified System Engineer (MCSE)**

Studiodelta Srl - Via G. Amendola 162/1-70126 Bari

The MCSE certification path has allowed me to learn in depth the workings of TCP / IP, Windows Server and Exchange and SQL applications. These skills have allowed me to work at a high level in complex network environment

1996-1998 **First and second year of the degree course in Electrical Engineering**

Politecnico di Bari

I attended the first and second year of the degree course in Electrical Engineering but I have not completed the course which consists of 5 years.

1992-1996 **Scientific high school degree**

Scientific High School G. Salvemini - Bari

From 1992 to 1996 I obtained a scientific degree with the score 50/60.

PERSONAL SKILLS

Mother tongue(s) Italian

Other language(s)

	UNDERSTANDING		SPEAKING		WRITING
	Listening	Reading	Spoken interaction	Spoken production	
English	B2	C1	A2	A2	B1
Replace with name of language certificate. Enter level if known.					

Levels: A1/2: Basic user - B1/2: Independent user - C1/2 Proficient user
Common European Framework of Reference for Languages

Communication skills

My spoken English requires training, but my skills in written production and learning are good. I have skills in problem solving and implementation of IT systems, and my communication skills will initially be sufficient to work within a workgroup in an office. Within a few months I would be able to interface with the public in an autonomous way.

Organisational / managerial skills

- Leadership (I managed a team of two programmers and two systems analysts for the implementation of the "GAIA system" within the Port Authority of Bari)
- Trainer (I have been Microsoft Certified Trainer for the project RUPAR Basilicata, teaching networking, TCP / IP and IIS to classes of 30 people including government executives.)

- Job-related skills**
- I am capable of recognizing and assemble the components of a server system.
 - I can set up a server room (rack cabinet and UPS)
 - I am able to crimp network cables and correctly wire switches and routers

Computer skills I'm an expert in the installation, operation, optimization and troubleshooting of the following systems:

- Windows Server 2000, 2003, 2008R2 (32/64 bit, also clustered)
- Exchange Server (all versions, also clustered)
- Sql Server (all versions, also clustered)
- IIS (all versions)
- Sharepoint Server (all versions)
- HyperV
- ESXi 5 and 5.1
- CMS Joomla, Alfresco, Teamlab
- OpenNas and OwnCloud

- Other skills**
- Good knowledge of Linux operating systems (Debian, Centos, Fedora, etc..). Using these systems, especially for web based applications and where redundancy is required and the ability to distribute workload.
 - Very good knowledge of MAC OS X for graphic productions, multimedia and layout (Photoshop, Fireworks, Dreamweaver, Pagemaker, Xpress, Corel Suite, Studiovision, Cubase and Logic Audio)

- Driving licence**
- A, B

Other Infos

Goals

My main goal is to cover a responsible role in a company in the computer industry, possibly by coordinating the activity of one or more teams of systems engineers and technicians working in different projects.

I'd rather do a job that can reconcile the creative and organizational skills with strong propensity to teaching, support of users and the diffusion of knowledge. I propose as a resource already well formed and with several years of experience already gained, so I can ensure immediate productivity.

Another objective is to grow professionally, learning new technologies and constantly experimenting with the latest technological solutions offered by the market.

Interests and Hobbies

I am passionate about motorcycling, science, technology, and science fiction. I dedicate the weekends (and holidays in general) to travel, while my free time is dedicated to bringing my skills. I live the computer primarily as a passion and fun. I am also passionate about building model airplanes and I like to collect technological equipment of all kinds.

I guess what it means to work in a different country, but it is a challenge that is sure to win. I was on the Isle of Man in June 2013, immediately after the TT. I traveled with my bike from southern Italy and I fell in love with the island. I realized that my life must be here. I hope to give my contribution to the island and those who live there. I want to take care of the natural beauty of this place.
